JCC Cellar Coolers 2011

The JCC cellar cooler range from J & E Hall provides a range of cost effective and reliable units designed to maintain temperatures required for beer and wine cellars.

The units are fitted with a standard electronic controller across the range which allow room temperatures down to 4°C making the units suitable for extending the life of perishable goods such as fruit, flowers, dairy products and vegetables.

The JCC indoor units utilise brewery specification 6 fins per inch evaporator coils and a powder coated mild steel casing for ease of cleaning which together with the tried and tested condensing unit has produced a winning combination.

General specifications

- Galvanised mild steel casing with polyester powder coating
- Refrigerant R410A
- 6 fins per inch brewery specification evaporator coils
- Condensing unit fitted with rotary compressor
- Low pressure switch fitted to all indoor unit models
- Standard electronic temperature controller across four models
- Suitable for wall or ceiling mounting without the use of additional brackets

Benefits

- Cooling Capacity: 1.68kW - 6.70kW
- Low noise
- Cost effective solution
- Operates down to 4°C
- Small footprint
- Ease of installation
- Accurate temperature control
